

Opus Care Training & Compliance Package

MVP course catalogue, deployment guide and recommended assignment matrix

This package contains original Opus Care internal learning resources plus links to official external training. It is designed for direct use in the Opus Care Staff Portal without Moodle or a third-party LMS.

Recommended onboarding pathway

- Before or at commencement: upload worker screening evidence (where required/company policy), identity/right-to-work checks, driver evidence if role requires driving, First Aid/CPR where required.
- Official external: NDIS Worker Orientation - Quality, Safety and You.
- Internal modules 01 to 08: assign to all support workers.
- Module 09 Infection Prevention: assign to all support workers and refresh periodically.
- Official external: Supporting Effective Communication.
- Official external: Safe and Enjoyable Meals where mealtime assistance is part of the role.
- NSW Ageing and Disability Commission safeguarding training: highly recommended external completion.
- Role-specific competencies: assign only when the worker's actual duties require them.

Suggested course configuration

Course	Type	Mandatory	Suggested review
Opus Care Induction & NDIS Foundations	Read + Quiz	Yes	12 months
NDIS Code of Conduct, Rights, Choice & Control	Read + Quiz	Yes	12 months

Effective Communication & Supported Decision-Making	Read + Quiz	Yes	12 months
Risk, Dignity of Risk, Lone Work & WHS	Read + Quiz	Yes	12 months
Infection Prevention & Safe Support Basics	Read + Quiz	Yes	12 months
External Certificates & Mandatory Training Guide	Read + Quiz	Admin/Staff guide	review annually; external credentials use actual expiry date

Portal implementation notes

- Store PDFs in authenticated Supabase Storage and expose them only to assigned staff/admin through signed URLs.
- Load quiz JSON into the course builder or seed it directly into training_courses.quiz_questions.

- Use 80% as default pass mark. Failed attempts should be stored separately from successful completions.
- Generate internal certificates only after a successful completion; store certificate ID permanently.
- For external certificates, store uploaded evidence and real expiry dates; do not generate replacement certificates.
- Compliance percentage should count valid mandatory assignments only.

Important scope boundary

These internal modules are suitable for orientation, policy knowledge and awareness. They are not competency assessments for manual handling, medication administration, high-intensity daily personal activities, restrictive practices, clinical tasks, First Aid or CPR. Practical/role-specific competence must be verified separately.
